

rocr::amd::elf::GElfNote
Section::segment

```
graph LR; A[rocr::amd::elf::GElfNote  
Section::segment] --> B[rocr::amd::elf::GElfSection  
::segment]
```

A diagram showing a relationship between two C++-style identifiers. On the left, a gray rectangular box contains the text 'rocr::amd::elf::GElfNote' on the top line and 'Section::segment' on the bottom line. A dark blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'rocr::amd::elf::GElfSection' on the top line and '::segment' on the bottom line. Both boxes have a thin black border.

rocr::amd::elf::GElfSection
::segment
