

rocr::amd::elf::GElfRelocation
Section::addData

rocr::amd::elf::GElfRelocation
Section::getData

rocr::amd::elf::GElfRelocation
Section::size

```
graph LR; A[rocr::amd::elf::GElfRelocationSection::addData] --> C[rocr::amd::elf::GElfRelocationSection::size]; B[rocr::amd::elf::GElfRelocationSection::getData] --> C;
```

The diagram illustrates a relationship between three functions. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'rocr::amd::elf::GElfRelocation Section::addData' and the bottom box contains 'rocr::amd::elf::GElfRelocation Section::getData'. On the right, a gray rectangular box contains the text 'rocr::amd::elf::GElfRelocation Section::size'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'addData' and 'getData' functions are associated with or point to the 'size' function.
