

rocr::amd::elf::GElfRelocation
Section::addRelocation

rocr::amd::elf::GElfRelocation
Section::getData

rocr::amd::elf::GElfRelocation
Section::offset

```
graph LR; A[rocr::amd::elf::GElfRelocation  
Section::addRelocation] --> C[rocr::amd::elf::GElfRelocation  
Section::offset]; B[rocr::amd::elf::GElfRelocation  
Section::getData] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, two white rectangular boxes represent source functions: 'rocr::amd::elf::GElfRelocation Section::addRelocation' (top) and 'rocr::amd::elf::GElfRelocation Section::getData' (bottom). On the right, a gray rectangular box represents a target function: 'rocr::amd::elf::GElfRelocation Section::offset'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both source functions are associated with or mapped to the target function.
