

rocr::amd::elf::GElfRelocation
Section::updateAddr

```
graph LR; A[rocr::amd::elf::GElfRelocation  
Section::updateAddr] --> B[rocr::amd::elf::GElfRelocation  
Section::addr];
```

A diagram showing a call from the `updateAddr` method to the `addr` attribute. It consists of two rectangular boxes connected by a blue arrow pointing from left to right. The left box is white with a black border and contains the text `rocr::amd::elf::GElfRelocation` and `Section::updateAddr`. The right box is gray with a black border and contains the text `rocr::amd::elf::GElfRelocation` and `Section::addr`.
