

rocr::amd::elf::GElfString
Table::addData

rocr::amd::elf::GElfString
Table::getData

rocr::amd::elf::GElfString
Table::size

```
graph LR; A[rocr::amd::elf::GElfString Table::addData] --> C[rocr::amd::elf::GElfString Table::size]; B[rocr::amd::elf::GElfString Table::getData] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, two white rectangular boxes represent source functions: 'rocr::amd::elf::GElfString Table::addData' (top) and 'rocr::amd::elf::GElfString Table::getData' (bottom). On the right, a gray rectangular box represents the target function: 'rocr::amd::elf::GElfString Table::size'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both 'addData' and 'getData' are associated with or mapped to the 'size' function.
