

rocr::amd::elf::Relocation

```
graph BT; A[rocr::amd::elf::GElfRelocation] --> B[rocr::amd::elf::Relocation]
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a white box labeled 'rocr::amd::elf::GElfRelocation'. A blue arrow points vertically upwards from this box to a gray box at the top labeled 'rocr::amd::elf::Relocation'. This indicates that 'rocr::amd::elf::GElfRelocation' inherits from 'rocr::amd::elf::Relocation'.
