

rocr::amd::elf::Segment

```
graph BT; GElfSegment[rocr::amd::elf::GElfSegment] --> Segment[rocr::amd::elf::Segment];
```

The diagram illustrates an inheritance relationship between two classes. At the bottom is a white box labeled 'rocr::amd::elf::GElfSegment'. A blue arrow points upwards from this box to a gray box at the top labeled 'rocr::amd::elf::Segment', indicating that 'rocr::amd::elf::GElfSegment' inherits from 'rocr::amd::elf::Segment'.
