

rocr::amd::hsa::loader
::Loader

```
graph BT; AmdHsaCodeLoader[rocr::amd::hsa::loader::AmdHsaCodeLoader] --> Loader[rocr::amd::hsa::loader::Loader];
```

The diagram illustrates an inheritance relationship between two classes. At the bottom is a gray box representing the base class, `rocr::amd::hsa::loader::AmdHsaCodeLoader`. A blue arrow points upwards from this box to a white box at the top, which represents the derived class, `rocr::amd::hsa::loader::Loader`. Both boxes have a black border and contain their respective class names in two lines.
