```

The diagram illustrates a mapping or inheritance relationship. On the left, two white rectangular boxes represent source functions: 'rocr::amd::hsa::loader::KernelSymbol::GetInfo' (top) and 'rocr::amd::hsa::loader::VariableSymbol::GetInfo' (bottom). On the right, a gray rectangular box represents the target function: 'rocr::amd::hsa::loader::SymbolImpl::GetInfo'. Two blue arrows point from the source boxes to the target box, indicating that both source functions are mapped to or inherit from the target function.
